## Job Opportunities

### Engineer Position at the California Department of Water Resources

Are you looking for a job that can support water resources management of the State of California with your insight, knowledge, and modeling and data analysis skills? Discover your full potential and develop your career with us. The Department of Water Resources' Modeling Support Office Central Valley Modeling Section is seeking a qualified candidate who can solve complex challenges associated with Sacramento-San Joaquin River Delta (the Delta) and beyond.

Under the supervision of a Senior Engineer, Water Resources in the Central Valley Modeling Section of the Modeling Support Office, the incumbent is responsible for developing and maintaining present and future levels of hydrologic inputs of CalSim 3.0 model as well as conducting various CalSim 3 model studies.

Pay Range: \$5,849.00 - \$10,956.00 per month

Final filing date: June 14, 2022

Visit the link below to learn more about the position and how to

apply: <https://www.calcareers.ca.gov/CalHrPublic/Jobs/JobPosting.aspx?JobControlId=309205>

## Professional Development and New Courses

### DataLab Affiliates Planning/Brainstorming Meeting

WHEN: Tuesday, June 14th, 4-6pm

WHERE: Shields Library Courtyard (inside the library)

WHO: Any UC Davis graduate students or postdocs interested in engaging with DataLab's data science research, training, and learning! Current and alumni DataLab Affiliates are especially encouraged to

attend.

DataLab (<http://datalab.ucdavis.edu>) is a cross-university effort that supports data science research and training. Our Affiliates program has been quiet during the past two years of the pandemic as our community's needs were understandably elsewhere, and we're looking to reboot the program this coming fall. Our goal for the Affiliates program is to provide graduate students and postdoctoral scholars with opportunities to grow their data science engagement in a structured and supportive way. Affiliates will gain access to additional resources, training events, hackathons, and teaching opportunities, along with an official DataLab Affiliation.

The bottom line is that if you're interested in helping us help you grow your data science expertise and network on campus, this event is for you!

Please join us in the Shields Courtyard (inside the library) for pizza and soda so that we can discuss how to design an Affiliates program that meets your needs! All graduate students and postdocs are welcome!

Please RSVP at this link, so that we can order enough food.
