CA DWR Water Resource Modeling Opportunity

DWR hires one water resource engineer/modeler in the CalSim/CalLite application group within the Modeling Support Office. This position focuses on developing and analyzing modeling studies for State Water Project and Central Valley Project operations. What to like about this team is working with various people: SWP Operations and Maintenance staff, Bureau of Reclamation modelers, DWR climate change group, etc. This team is also key in developing studies to inform/support urban water management planning (Delivery Capability Report), policy (Bay-Delta Water Quality Control Plan, Long Term Operations of the CVP and SWP), etc.

**Deadline:** March 14th, 2023
